BOOKS OFFERED TO INNER SOUL

THIS type family can be seen as a historical approach that considers our increasing needs for freedom in a post-historical world. JANA THORK is a synthesis of the stone engraved capital letterforms and the uncial and half-uncial calligraphic styles.

The idea of the typeface designer, RICARDO ESTEVES GOMES, was to seek

for the limits between our uppercase and lowercase mental concepts. In this respect, it unites references from both Roman and Celtic cultures in one place. JANA THORK family includes a lot of ligatures and swashes. If you want to use open type features you can see them all in one font, that is JANA THORK PRO.
